JUSTIFICATION:

Biologists observed 25 goats (19% kids) during a survey conducted in the fall of 2015. During a subsequent survey conducted in the fall of 2019 biologists observed 28 goats (only were 7% kids). In addition, above average snowfall over the past two winters may have increased winter mortality. Due to the vulnerability of goats in this area, an emergency order (01-14-21) is being issued effective at 11:59 pm, Saturday, September 25, 2021.
